```
1: #include <stdio.h>
2: #define N 10
3: /* Instructions */
4: //ifline{8}{18} indicates subrange of code lines to draw attention to.
5: //It takes 4 arguments, the first 2 are the range (inclusive) of the area to highlight.
6: //The other 2 are format parameters to customize the appearance of highlighted area and
7: //non highlighted area. The 3th argument formats the highlighted area, the 4th argument
8: //Formats the non-highlighted area. If you don't need to highlight an specific range of
9: //code lines, avoid using the ifline command.
10:
11: int main()
12: {
13:     int i;
14:
15:     // Line comment.
16:     puts("Hello world!");
17:
18:     for (i = 0; i < N; i++)
19:     {
20:         puts("LaTeX is also great for programmers!");
21:     }
22:
23:     return 0;
24: }
```
